institutional arrangements constitute the rules of the game for any civil and political society

to understand urban politics and policy making including issues dealing with economic development zoning constituency representation government borrowing and service contract decisions discovering institutional regularities is key to achieve this the authors combine older institutional approaches emphasizing formal structure and governance organizations with newer approaches and transaction cost theory institutional constraints and policy choice contends that institutional arrangements both shape and are shaped by human behavior and when combined with contextual factors and the uncertainty associated with leadership turnover provide the basis of understanding how decisions are made at the level of local government

this book offers an insight into the historical institutional and topical development of the eu policy in the areas of justice home affairs and security well embedded in a broader international context the main part of the book dedicated to the eu is therefore preceded by a part on relevant cooperation on the benelux and schengen levels and followed by a part on cooperation in the areas concerned on council of europe nato osce g8 oecd and un levels without a proper understanding of those cooperation levels the development and functioning of the eu would be hard to fully grasp before addressing the actual policy dimension all parts start with a historical introduction and a sketch of institutional structures and functioning for students and professionals in criminology law and political science and every one interested in european and international criminal policy making this book will prove relevant or insightful

this collection of essays deals with the concept of policy practice the way in which policies and particularly development policies are constructed and implemented in the context of bureaucracies which have their own grammars of analysis and action these institutional modes of thinking and doing have coloured and shaped the reality of economic and social development programmes the results and ironies of which are addressed in these articles all published here for the first time by the late bernard schaffer and some of his contemporaries and colleagues in the field of development studies

in twelve essays influential scholars in political science explore the meaning of political leadership from the kaleidoscopic perspectives of the leaders institutions goals procedures problems and traditions involved the approaches as varied as the subject itself coalesce around the central question of how leaders interact with transform or are controlled by the organizations they lead

education is intimately connected to many of the most important and contentious questions

confronting american society from race to jobs to taxes and the competitive pressures of the global economy have only enhanced its significance elementary and secondary schooling has long been the province of state and local governments but when george w bush signed into law the no child left behind act in 2002 it signaled an unprecedented expansion of the federal role in public education this book provides the first balanced in depth analysis of how no child left behind nclb became law patrick mcguinn a political scientist with hands on experience in secondary education explains how this happened despite the country s long history of decentralized school governance and the longstanding opposition of both liberals and conservatives to an active reform oriented federal role in schools his book provides the essential political context for understanding nclb the controversies surrounding its implementation and forthcoming debates over its reauthorization how the struggle to define the federal role in school reform took center stage in debates over the appropriate role of the government in promoting opportunity and social welfare he places the evolution of the federal role in schools within the context of broader institutional ideological and political changes that have swept the nation since the 1965 elementary and secondary education act chronicles the concerns raised by the 1983 report a nation at risk and shows how education became a major campaign issue for both parties in the 1990s mcguinn argues that the emergence of swing issues such as education can facilitate major policy change even as they influence the direction of wider political debates and partisan conflict mcguinn traces the republican shift from seeking to eliminate the u s department of education to embracing federal leadership in school reform then details the negotiations over nclb the forces that shaped its final provisions and the ways in which the law constitutes a new federal education policy regime against which states have now begun to rebel and that only by understanding the unique dynamics of national education politics will reformers be able to craft a more effective national role in school reform

the commission s directorate general for economic and financial affairs hosted a workshop on making work pay policies and indicators in march 2005 a particularly opportune moment to discuss these issues since it coincided with the new start for the lisbon strategy with its increased focus on growth and jobs the purpose of the workshop was to contribute to the debate on reforms of tax and benefit systems it took stock of the most recent studies by academic researchers in this area and brought some recently developed indicators on work incentives to the attention of the participants it also provided an opportunity for discussion between academic researchers and labour market experts in national administrations and eu institutions the papers presented in the workshop demonstrate that there are tangible

benefits in bringing together academic researchers and national policy makers to exploit research findings compare experiences and exchange best practices to shape further reforms this volume brings those contributions together they shed light on highly topical issues such as indicators on incentives the role of incentives eligibility rules and enforcement the responsiveness of labour supply and the lessons that can be learnt from national labour market reforms

in this pathbreaking work the author integrates questions of justice and stability through a model of deliberative democracy in the plural polity deliberative democracy and the plural polity provides a realistic but critical reform agenda that can animate struggles for justice in an enormously diverse world

the proliferation of international institutions and their impact has become a central issue in international relations why do countries comply with international agreements and how do international institutions influence national policies most theories focus on the extent to which international institutions can wield carrots and sticks directly in their relations with states xinyuan dai presents an alternative framework in which they influence national policies indirectly by utilizing non state actors ngos social movements and empowering domestic constituencies in this way even weak international institutions that lack carrots and sticks may have powerful effects on states supported by empirical studies of environmental politics human rights and economic and security issues this book sheds fresh light on how and why international institutions matter it will be of interest to students scholars and policymakers in both international relations and international law
